

## Stress Awareness Month...

### April was Stress Awareness Month

Stress Awareness is something Highline prioritise to promote throughout the business. Reducing stress levels is vital for good employee wellbeing and thus boosts a positive morale within the office and on site. Alongside regular team building events, we encourage all employees to take frequent breaks from their computer and get fresh air along Ware's riverside.

## Project Completion...

### Lab Completion

Our Specialised Works team have recently completed a project for one of our longstanding Pharmaceutical clients based in Ware. The project scope consisted of converting the existing lab space into two separate lab areas including the reconfiguration of the current cabinets and the architectural finishes to the overall area. It was important for both areas to be compliant with fire regulations, so the team carried out fire prevention installations throughout. Finally, remedial works were carried out on the vinyl flooring and the areas were fitted out with appropriate Trespa workbenches.

## Asbestos and Me Campaign...

Asbestos didn't disappear when it was banned in the UK and remains in millions of homes and buildings today. Tradespeople have an increased risk of disturbing asbestos which is why we're supporting the Asbestos & You campaign from HSE.

## Highline's Office Turns 2...

It has officially been 2 years since we received the keys to our head office on Baldock Street! Within this time, we have delivered over 150 projects through our Specialised Works team and Capital Projects team. We have expanded our team and invested thousands into ensuring all training is renewed and sufficient for our clients. We look forward to see what the next few years this office has in store for us!

## Welcome to the team...

**Natasha Griggs**  
SHEQ Manager

### What is the most rewarding part of being a SHEQ manager?

The most rewarding part of my job is knowing that people leave work at the end of the day in the same state (if not better) than when they arrived at work. A healthy, safety conscious workforce is paramount.

**Liam Ford**  
Quantity Surveyor

### What are you most looking forward to in your new role with Highline?

I am looking forward to continuing to work with everyone at Highline to win and deliver projects!
