Project Completion - Grade II Hospital...

Our team have successfully completed the full refurbishment of the 10 bedroom 10 ensuite 4th floor ward within our clients grade II listed hospital wing in Chelsea. The ward refurbishment works included all the additional supporting rooms, that are necessary to run the facility. These rooms included, staff changing, WC's, showers, storerooms and a nurse base. Initially the ward was stripped back to reveal the original concrete soffits and parquet flooring – all existing wiring, lighting, security, data, and the traditional heating and cooling were removed or diverted to make way for the new installation.

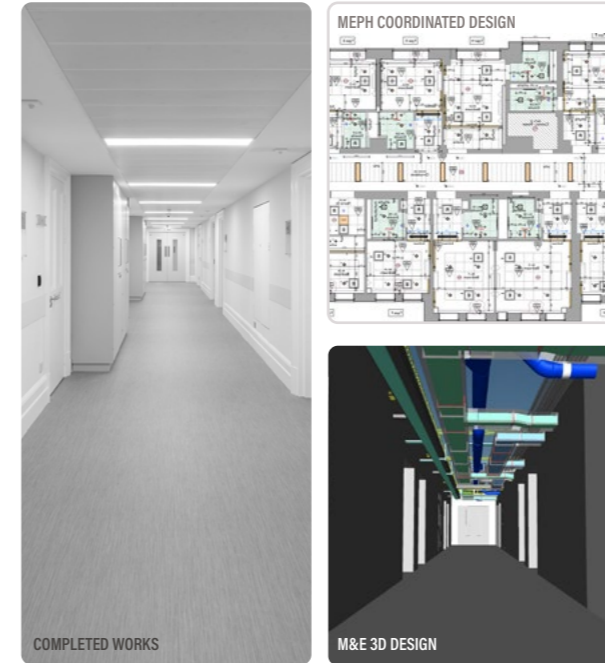

Our D&B Capabilities...

Our team comprises of skilled Directors, Managers, and Consultants who are capable of managing projects from the design phase to completion, bringing any vision to life. Explore our case studies to see our work in action!

Highline's Environmental Focus...

This month we supported the Meat Free Monday campaign here at Highline. The office staff really got involved and gave it their best efforts to go meat free for the day. Using an online environmental impact calculator, we were able to reduce our environmental impact for the month. By just opting to eat meat free one day a week as a collective we were able to reduce the amount of greenhouse gases produced which were equivalent to 5,592 toilet flushes worth of water, almost one full tennis court of forest saved and approximately 40.56 fish were saved.
