

Highline in the Isle of Man...

Highline had the opportunity to work with a new client on a specialised project in the Isle of Man. We jumped at the chance to travel to this beautiful island to assist with the clients requirements. Within two weeks a team was mobilised to take part in a three-day trip to remove and replace flooring. We think you will agree the before and after photographs speak for themselves.

Propski 2023...

Three members of our team attended Propski in Val Thorens. This annual event provides the opportunity to meet with industry experts and network whilst enjoying the amazing scenery and skiing opportunities. The team had a great time with some useful meetings and Highline contributed to the charity raffle in support of three charities:

- **Land Aid** – Ending youth homelessness
- **Protect our winters** – Non profit working against climate change
- **ELIFAR** – Helping to improve the lives of children and young adults with severe learning and physical disabilities

Highline are proud to support these worthy causes.

Spotlight on Recycling...

Highline have been collecting milk bottle lids for the past year in support of **Friends of Water Search & Rescue**. This raises money for a worthy cause and these lids are recycled in to items such as traffic bollards and cones. We managed to collect hundreds of lids and plan to continue to support this charity throughout 2023. For more information please visit their website via the QR code below:
