Prop Ski...

Ending the month networking on the slopes - Brad Pammen, Neal Kavanagh and Fabio Barsanti headed to France for the annual prop-ski event. This event is a great opportunity to connect with specialists in a variety of construction trades whilst enjoying the mountain views!

Project Wins...

1. Highline have been awarded and are currently on site to deliver the installation of a new changing and toilet facility for a major pharmaceutical client based in Ware! Our Project Manager is working alongside our Technical Services Manager to assist with the fire detection and voice alarm works, as well as the high level of mechanical works required for this reconfiguration. Follow our social media for updates!

2. Highline are happy to announce that we have secured our largest project to date within the pharmaceutical industry! Throughout the year of 2024, we will be constructing a brand new building for our client in which they use as a security check-in area! The project is being constructed under both the Considerate Constructors Scheme and the BREEAM assessment framework. We will be filming the site construction, so stay tuned for the final video!

West Ham United Sponsorship...

Highline was honoured to sponsor West Ham United at the West Ham vs Bristol City match on Sunday 7th January. What a way to kick off the year! Despite the final score being a draw, it was a great day out and an amazing experience to see the Highline logo around the stadium. It was a huge reminder of how far we've come as a business and a day to be remembered for years to come!

Health & Safety Focus...

Subcontractor Vetting

Our internal SHEQ Manager, Natasha has been working extensively with the team to update Highline's subcontractor vetting questionnaire to ensure it corresponds with our own policies and company ethos. We have an extensive subcontractor list for any works that we cannot carry out inhouse, all of which are thoroughly vetted to ensure they are competent to undertake the specified works and align with our own standards in regards to health, safety and quality.
