Project Completion...

Works

Highline have recently completed a Pedestrian Segregation and Goods-In Upgrade project. The internal loading bay works included constructing a dedicated contractor's goods-in counter, repainting the walls and flooring, installing new key clamp barriers and safety floor markings. Externally, we provided a new bespoke Dewar bottle store and forklift canopy to house two electrical forklifts, new lighting and charging points were also provided. Further safety features were upgraded to include all new line and warning road markings, additional bollards with sprung safety gates and chain access points.

Feedback

"Good delivery in a difficult area to manage with limited impact to BAU"

"Darren's due diligence, forward thinking and attention to detail has ensured that we have a very happy client and the works were completed to the high standard we all expect."

"Darren was very accommodating, listened and acted upon any of our concerns and communicated clearly throughout. This made what could have been a challenging few weeks into a very straightforward process"

Project Win...

Fitout of Outpatient Clinic

A huge congratulations to Highline for securing a design and build project based in the SE1 postcode of London for a major Private Healthcare client! Works have begun on site, take a look at our set up below:

Spotlight on...

Recycle4charity

As a company Highline have pledged to recycle office waste wherever possible. We utilise Recycle4charity to recycle printer ink cartridges. This is a great service that not only keeps waste from going to landfill but also generates money for the charity of our choice!

Subcontractor Quality Compliance

Quality is of paramount importance to Highline; consistent quality objectives between all stakeholders is vital to a successful project handover. Here are some methods below to show how we maintain subcontractor compliance throughout the lifecycle of a project.

- ✓ Annually renewed Subcontractor Quality Questionnaires
- ✓ Holding weekly / monthly subcontractor meetings
- ✓ Toolbox talks, Daily Safety Briefings
